**SEMESTER - II  
CHEMISTRY - II****1. Course Description**

**Programme: B.Sc.**  
**Course Code: U26/CHE/DSC/201**  
**Course type: DSC - 2**  
**No. of credits: 4**

**Max. Hours: 60**  
**Max. Marks: 100**  
**Hours per week: 4**

**2. Course Objectives**

- To enable students to critically understand the electronic structure, periodic trends, magnetic and spectral properties, complex formation, and applications of d- and f-block elements.
- To develop a clear understanding of the structure, reactivity, preparation methods, and reaction mechanisms of halogen compounds, alcohols, ethers, and carbonyl compounds.
- To provide a comprehensive understanding of electrochemical principles, including electrode potentials, electrochemical cells, and their practical applications.
- To impart fundamental knowledge of chemical bonding theories, stereochemical concepts, and colligative properties to explain the structure and behavior of chemical substances.

**3. Course Outcomes**

On completion of the course the student will be able to

- Explain and predict the chemical behavior of d- and f-block elements based on electronic structure and bonding principles.
- Analyze reactions and predict products of halogen, alcohol, ether, and carbonyl compounds.
- Calculate electrode potentials, analyze electrochemical cells, and apply electrochemical concepts to practical systems such as batteries and corrosion.
- Students will be able to apply bonding theories, distinguish stereoisomers, and solve numerical problems related to colligative properties.

DEPARTMENT OF CHEMISTRY, ST. FRANCIS COLLEGE FOR WOMEN, HYDERABAD.

## 4. Course Content

**MODULE I: INORGANIC CHEMISTRY**

15 h (1h/week)

**Chemistry of d-block elements**

7h

Characteristics of d-block elements with special reference to electronic configuration, variable oxidation states, color properties, d-d spectral transitions, ability to form complexes, magnetic properties, calculation of magnetic moment-spin only formula & catalytic properties. Comparative treatment of second and third transition series with their 3d analogues.

**Chemistry of f-block elements**

8h

**Chemistry of Lanthanides:** Position in periodic table, electronic structure, oxidation state, ionic and atomic radii/ionic radii- lanthanide contraction- cause and consequences, anomalous behavior of post lanthanides-complexation-type of donor ligands preferred. Magnetic properties- paramagnetism, color and spectra, f-f transitions-occurrence and separation-ion exchange method, solvent extraction.

**Chemistry of actinides:** General features-electronic configuration, oxidation state, actinide contraction, color and complex formation. Comparison with lanthanides.

**IKS:** Case studies on The Iron Pillar of Delhi – Metallurgical Excellence and Monazite Sands of Kerala – Source of Rare Earths and Thorium.

**MODULE II: ORGANIC CHEMISTRY**

15 h (1h/week)

**Halogen compounds**

4 h

Classification: alkyl (primary, secondary, tertiary), aryl, aralkyl,. Chemical reactivity - reduction, formation of RMgX, Nucleophilic substitution reactions – classification into  $S_N1$  and  $S_N2$ . Mechanism and energy profile diagrams of  $S_N1$  and  $S_N2$  reactions. Stereochemistry of  $S_N2$  (Walden Inversion) 2-bromobutane,  $S_N1$  (Racemization) 1-bromo-1-phenylpropane.

**Hydroxy compounds and ethers**

5 h

**Alcohols:** Preparation: 1°, 2° and 3° alcohols using Grignard reagent, Reduction of Carbonyl compounds, carboxylic acids and esters. Physical properties: H-bonding, Boiling point and Solubility. Reactions with Sodium, HX/ZnCl<sub>2</sub> (Lucas reagent), oxidation with conc. HNO<sub>3</sub> and Oppenauer oxidation (Mechanism).

**Phenols:** Preparation: (i) from diazonium salts of anilines and (ii) from benzene sulphonic acids. Properties: Acidic nature, formation of phenoxide and reaction with R-X, electrophilic substitution; halogenations, Reimer Tiemann reaction (Mechanism), Gattermann-Koch reaction, Schotten Baumann reaction.

**Ethers:** Nomenclature, preparation by Williamson synthesis. Chemical properties – inert nature, action of conc. H<sub>2</sub>SO<sub>4</sub>.

Head

Department of Chemistry

St. Francis College for Women

DEPARTMENT OF CHEMISTRY, ST. FRANCIS COLLEGE FOR WOMEN, HYDERABAD

Begumpet, Hyderabad-16, 500 007

Professor

Department of Chemistry

Osmania University

HYDERABAD - 500 007

**Carbonyl compounds**

6h

Preparation of aldehydes & ketones from acid chlorides, nitriles and carboxylic acids. Special methods of preparing aromatic aldehydes and ketones by Oxidation of arenes. Physical properties – absence of Hydrogen bonding. Reactivity of the carbonyl groups in aldehydes and ketones. Chemical reactivity: Addition of (a) NaHSO<sub>3</sub> (b) HCN (c) RMgX (d) 2,4-DNP (Schiff base). Addition of H<sub>2</sub>O to form hydrate, addition of alcohols - hemiacetal and acetal formation. Cannizzaro reaction. Oxidation reactions – KMnO<sub>4</sub> oxidation, reduction – catalytic hydrogenation, mechanism of Clemmensen reduction, Meerwein-Ponndorf-Verley reduction.

**MODULE III: PHYSICAL CHEMISTRY**

15 h (1h/week)

**Electrochemistry**

15h

Revision of conductance, specific conductance, equivalent conductance and factors influencing conductance of electrolytes. Ionic mobility, definition and significance of transport number. Kohlrausch's law – its applications: determination of degree of dissociation and acid dissociation constant ( $K_a$ ) of weak acids, solubility product determination and conductometric titrations. Ostwald's dilution law - its uses and limitations. Debye- Hückel -Onsager's equation for strong electrolytes (elementary treatment only).

**Types of electrodes** with examples - Types of reversible electrodes - the gas electrode, metal metal ion, metal-insoluble salt, redox electrodes and ion-selective electrode. Reversible and irreversible cells; Nernst equation – EMF of a cell; representation of a cell-problems; electrode potentials-electrochemical series and its significance. Determination of pH – using quinhydrone and glass electrodes. Potentiometric titrations.

**MODULE IV: GENERAL CHEMISTRY**

15 h (1h/week)

**Chemical Bonding**

5h

Molecular orbital theory: Shapes and sign convention of atomic orbitals. Modes of bonds. Criteria for orbital overlap. LCAO concept.  $\pi$  and  $\sigma$  overlapping. Concept of Types of molecular orbitals: bonding, antibonding and non-bonding. MOED of homonuclear diatomic molecules - H<sub>2</sub>, N<sub>2</sub>, O<sub>2</sub>, O<sub>2</sub><sup>-</sup>, O<sub>2</sub><sup>2-</sup>, F<sub>2</sub> (unhybridized diagrams only) and heteronuclear diatomics - CO, CN<sup>-</sup>, NO, NO<sup>+</sup> and HF, their bond order, stability and magnetic properties.

**Stereoisomerism**

5h

**Optical activity:** Definition, wave nature of light, plane polarized light, optical rotation and specific rotation, chiral centers. Chiral molecules: definition and criteria - absence of plane, center and S<sub>n</sub> axis of symmetry – asymmetric and dissymmetric molecules. Examples of asymmetric molecules (Glyceraldehyde, Lactic acid, Alanine) and dissymmetric molecules (trans- 1,2-Dichlorocyclopropane). Molecules with constitutionally symmetrical chiral carbons (Tartaric acid) Molecules with constitutionally unsymmetrical chiral carbons (2,3-Dibromopentane). D, L configuration – examples. R, S – configuration: Cahn-Ingold-Prelog (CIP) rules.

**Colligative Properties**

5h

Definition of colligative properties- relative lowering of vapour pressure-Raoult's law; Osmotic pressure; elevation of boiling point and depression of freezing point; thermodynamic relation between molecular weight and colligative property (derivations not required) -Problems.

## b. Components on Skill Development/Entrepreneurship Development/Employability

| SD/ED<br>/EMP                   | Syllabus<br>Content | Description of Activity   |
|---------------------------------|---------------------|---|
| SD                              | Module I            | Encourage them to compare and discuss trends in reactivity and chemical behaviour.  |
| EMP                             | Module II           | Design and present a synthetic pathway for an industry-relevant product using halogen, hydroxy, ether, and carbonyl compounds, including mechanism and yield.                           |
| ED<br>(NSQF<br>level 3<br>or 4) | Module III          | Enables students to identify opportunities and develop innovative, cost-effective solutions in energy storage, corrosion control, electroplating, and other electrochemical industries. |
| EMP                             | Module IV           | Solve and present a set of application-based problems on chemical bonding, stereochemistry, and colligative properties, explaining reasoning and calculations.                          |

## c. IKS component:

| IKS | Syllabus Content   | Module |
|-----|--|--------|
|     | Introduced Case studies on The Iron Pillar of Delhi – Metallurgical Excellence and Monazite Sands of Kerala – Source of Rare Earths and Thorium. | I      |

## 7. Pedagogy

| S. No. | Student Centric Methods<br>Adopted | Type / Description of Activity    |
|--------|------------------------------------|-----------------------------------|
| 1      | Experiential learning              | Field trips                       |
| 2      | Participative Learning             | Presentations/Peer-teaching       |
| 3      | Problem solving                    | Case studies/ Data interpretation |

## 8. Course Assessment Plan

## a) Weightage of Marks in Continuous Internal Assessments and End Semester Examination

| CO  | Continuous Internal Assessments CIA - 40%                  | End Semester Examination-60% |
|-----|--|------------------------------|
| CO1 | CIA-1: Written Exam  | Written Exam                 |
| CO2 | CIA-2: Quiz/Assignment/3D model making                     |                              |
| CO3 | CIA-1: Written Exam  |                              |
| CO4 | CIA-2: Assignment (Crossword/Word search/ Problem solving) |                              |

## b) Model Question Paper - End Semester exam Theory

St. FRANCIS COLLEGE FOR WOMEN, BEGUMPET, HYDERABAD-500016  
(An Autonomous College Affiliated to Osmania University)

Faculty of Science – Department of Chemistry

MODEL PAPER

B.Sc. I YEAR SEMESTER -II

CHEMISTRY - II

Time: 2 hrs

Course Code: U26/DSC/CHE/201

Max. Marks: 60

## SECTION –A (Essay Questions)

## I. Answer the following

4x 10=40 Marks

1. What are Transition elements? Explain the general properties with reference to Complex formation, magnetic properties and variable oxidation states. 10M  
OR
2. a. What is lanthanide contraction and explain its consequences. 5M  
b. How are lanthanides separated by ion exchange method? 5M
3. a. Explain the mechanism and stereochemistry of  $S_N1$  reaction. 5M  
b. How are  $1^\circ$ ,  $2^\circ$  and  $3^\circ$  alcohols prepared from carbonyl compounds using Grignard reagent? 5M  
OR
4. Formulate the steps involved in the mechanism of (i) Reimer -Teimann reaction and (ii) Cannizzaro reaction. 10M
5. a. Explain standard hydrogen electrode (SHE). 5M  
b. State Ostwald's dilution law. Discuss its uses and limitations. 5M

DEPARTMENT OF CHEMISTRY, ST. FRANCIS COLLEGE FOR WOMEN, HYDERABAD.  
Department of Chemistry  
St. Francis College for Women  
Begumpet, Hyderabad-16.

Professor  
Department of Chemistry  
Osmania University

OR

6. a. State Kohlrausch law and mention its applications. 5M  
 b. Describe Hittorf method for the determination of Transport number. 5M
7. Write the postulates of MOT and explain the MOED of O<sub>2</sub>. 10M

OR

8. a. State and explain Raoult's law. 5M  
 b. What are enantiomers? Explain the optical isomers of Tartaric acid. 5M

**SECTION –B (Short Answer Questions)****II. Answer any four.****4x5=20 Marks**

9. Compare the properties of lanthanides with actinides.
10. How do you differentiate 1°, 2° and 3° alcohols based on the Lucas test?
11. Give equations for Williamson's ether synthesis and Clemmensen's reduction..
12. Write short notes on conductometric titrations.
13. What is an electrochemical series? What is its significance?
14. Discuss the R,S configuration of L-Alanine and D-Glyceraldehyde based on CIP rules.

**Question Paper Format - Blooms Taxonomy Level**

| SECTION A - INTERNAL CHOICE |        |  |     | 4 X 10 = 40 M |  |
|-----------------------------|--------|--|-----|---------------|--|
| Question Number             | Module | Question   | CO  | BTL           |  |
| 1                           | I      | What are Transition elements? Explain the general properties with reference to Complex formation, magnetic properties and variable oxidation states. 10M<br>OR                       | CO1 | Level 1 & 2   |  |
| 2                           | I      | a. What is lanthanide contraction and explain its consequences. 5M<br>b. How are lanthanides separated by ion exchange method? 5M  | CO1 | Level 1 & 3   |  |
| 3                           | II     | a. Explain the mechanism and stereochemistry of S <sub>N</sub> 1 reaction. 5M<br>b. How are 1°, 2° and 3° alcohols prepared from carbonyl compounds using Grignard reagent? 5M<br>OR | CO2 | Level 3       |  |

|   |     |  |                    |             |
|---|-----|--|--------------------|-------------|
| 4   | II  | Formulate the steps involved in the mechanism of (i) Reimer -Teimann reaction and (ii) Cannizaro reaction. 10M                       | CO2                | Level 4     |
| 5   | III | a. Explain standard hydrogen electrode (SHE). 5M<br>b. State Ostwald's dilution law. Discuss its uses and limitations. 5M<br>OR      | CO3                | Level 2     |
| 6   | III | a. State Kohlrausch law and mention its applications. 5M<br>b. Describe Hittorf method for the determination of Transport number. 5M | CO3                | Level 2 & 3 |
| 7   | IV  | Write the postulates of MOT and explain the MOED of O <sub>2</sub> . 10M<br>OR   | CO4                | Level 2 & 3 |
| 8   | IV  | a. State and explain Raoult's law. 5M<br>b. What are enantiomers? Explain the optical isomers of Tartaric acid. 5M                   | CO4                | Level 2 & 3 |
| <b>SECTION B - Short answer questions</b> |     |  |                    |             |
| <b>ANSWER ANY 4 OUT OF 6</b>              |     |  | <b>4 x 5 = 20M</b> |             |
| 9   | I   | Compare the properties of lanthanides with actinides.  | CO1                | Level 4     |
| 10  | II  | How do you differentiate 1°, 2° and 3° alcohols based on the Lucas test?   | CO2                | Level 4     |
| 11  | II  | Give equations for Williamson's ether synthesis and Clemmensen's reduction..   | CO2                | Level 2     |
| 12  | III | Write short notes on conductometric titrations.  | CO3                | Level 2     |
| 13  | III | What is an electrochemical series? What is its significance?   | CO3                | Level 2     |
| 14  | IV  | Discuss the R,S configuration of L-Alanine and D-Glyceraldehyde based on CIP rules.  | CO4                | Level 5     |

**SEMESTER -II**  
**LABORATORY COURSE-II - QUALITATIVE ANALYSIS**

**1. Course Description****Program: B.Sc.****Course Code: U26/CHE/DSC/201/ P****Course type: DSC-2****No. of Credits: 1****Max. Hours: 20****Max. Marks: 50****Hours per week: 2****2. Course Objective**

- To enable students to systematically identify and analyze anions and cations in salt mixtures using semi-micro qualitative analysis techniques.

**3. Course outcomes**

CO 1: Students will be able to systematically identify anions and cations in salt mixtures, interpret experimental observations, and write balanced equations for the reactions involved.

CO 2: Students will be able to apply the principles of common ion effect and solubility product to explain and justify the systematic separation and identification of both anions and cations in semi-micro qualitative analysis.

**4. Course Content****QUALITATIVE ANALYSIS - Semi micro analysis of mixtures**

Analysis of two anions (one simple, one interfering) and two cations in the given mixture.

**Anions:**  $\text{CO}_3^{2-}$ ,  $\text{SO}_3^{2-}$ ,  $\text{S}^{2-}$ ,  $\text{Cl}^-$ ,  $\text{Br}^-$ ,  $\text{I}^-$ ,  $\text{CH}_3\text{COO}^-$ ,  $\text{NO}_3^-$ ,  $\text{PO}_4^{3-}$ ,  $\text{BO}_3^{3-}$ ,  $\text{SO}_4^{2-}$

**Cations:**  $\text{Hg}_2^{2+}$ ,  $\text{Ag}^+$ ,  $\text{Pb}^{2+}$

$\text{Hg}^{2+}$ ,  $\text{Bi}^{3+}$ ,  $\text{Cd}^{2+}$ ,  $\text{Cu}^{2+}$ ,  $\text{As}^{3+}$  /  $\text{As}^{5+}$ ,  $\text{Sb}^{3+}$  /  $\text{Sb}^{5+}$ ,  $\text{Sn}^{2+}$  /  $\text{Sn}^{4+}$

$\text{Al}^{3+}$ ,  $\text{Cr}^{3+}$ ,  $\text{Fe}^{3+}$

$\text{Mn}^{2+}$ ,  $\text{Co}^{2+}$ ,  $\text{Ni}^{2+}$ ,  $\text{Zn}^{2+}$

$\text{Ca}^{2+}$ ,  $\text{Ba}^{2+}$ ,  $\text{Sr}^{2+}$

$\text{Mg}^{2+}$ ,  $\text{NH}_4^+$

(An Autonomous College Affiliated to Osmania University)

Faculty of Science – Department of Chemistry

**MODEL PAPER**

**B.Sc. I YEAR SEMESTER -II**

**LABORATORY COURSE-II - QUALITATIVE ANALYSIS**

Program: B.Sc.

Type of course: DSC-2

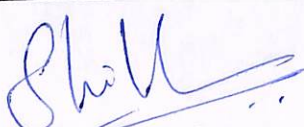

No. of credits: 1

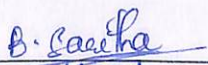

Course Code: U26/DSC/CHE/201/P

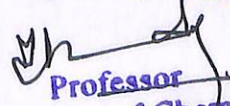

Time: 2 hrs

Max. Marks: 50

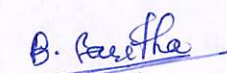

1. Using systematic procedure, identify and report two anions and two cations present in the given an unknown salt mixture. 30M
2. Record + Attendance 10M
3. Viva voce 10 M

**SEMESTER - II**  
**NUTRITION FOR THE FAMILY**

**1. Course Description****Programme: B. Sc****Course Code: U26/ NUT/ DSC/201****Type of Course: DSC-2****No. of Credits: 4****Max. Hours: 60****Hours per week: 4****Max. Marks: 60****2. Course Objectives**

1. To gain knowledge about the nutritional requirements and the basics of meal planning for various physiological age groups
2. To apply the principles and nutrition guidelines in meal planning in different stages of life cycle.

**3. Course Outcomes**

**After the successful completion of the course, the student will be able to:**

**CO1:** Understand the importance of a balanced diet, meal planning and nutritional requirements of adults.

**CO 2:** Understand and remember the different physiological changes during pregnancy, lactation and infancy.

**CO 3:** Understand the effect of nutrition on the growth and development of children

**CO 4:** Apply the guidelines and modifications of the diet during adolescence and old age period.

  
Prof. Bhanoori Manjula, Ph.D.,  
Department of Biochemistry  
University College of Science  
Osmania University  
Hyderabad - 500 007, TS

Head  
Dept. of Nutrition  
St. Francis College for Women  
Begumpet, Hyderabad-16.

**4. Course content****MODULE I: BALANCED DIET AND MEAL PLANNING (15 Hours)**

- 1.1. Balanced Diet:** Definition, Benefits, Nutrient requirement, recommended dietary allowances (RDA), Basic four food groups, Food Exchange List, Food pyramid.
- 1.2. Meal Planning:** Definition, Principles in meal planning, Points to be considered in planning a diet. Steps involved in planning a diet. Low Cost balanced diet.
- 1.3 Nutritional requirements of Adults:** RDA, Reference Man and Reference Woman. Nutritional and food requirements for an Adultman and woman according to Occupation.

**MODULE II: PREGNANCY, LACTATION AND INFANCY (15 Hours)**

- 2.1. Pregnancy:** Physiological stages during pregnancy, Preconception nutrition status, Nutritional requirements, Dietary Guidelines, General Dietary problems, and complications during pregnancy.
- 2.2. Lactation:** Physiology of lactation, Nutritional requirements during lactation, Dietary guidelines.
- 2.3. Infancy:** Growth and development during infancy, Nutritional requirements during infancy, advantages of Human milk over bottle feeding, Artificial Feeding, Weaning foods

**MODULE III: PRESCHOOLERS, SCHOOL GOING CHILDREN (15 Hours)**

- 3.1. Pre- School Children:** Milestones and growth chart, Nutritional requirements, factors to be considered while planning diets for preschoolers, dietary guidelines, Problems faced during feeding a preschooler.
- 3.2. School going children:** Nutritional requirements, food requirements, Packed lunch, factors to be considered while planning a packed lunch for school going children, Problems in feeding school going children.
- 3.3. School Lunch Programmes:** Objectives of feeding programmes. Intervention programmes in India, Mid - day meal programme, special nutrition programme, ICDS etc.

**MODULE IV: ADOLESCENCE AND GERIATRICS (15 Hours)**

- 4.1 Adolescence:** Role of hormones on growth and development, sequence of developmental changes, nutritional requirements during adolescence, challenges in adolescence, weight control, skipping meals, anorexia, fast foods.
- 4.2 Geriatrics:** Physiological changes during ageing Changes in organ function with ageing, nutritional requirements and dietary modifications. Dietary guidelines.
- 4.3 Common diseases affecting geriatric:** Osteoporosis, obesity, constipation, malnutrition.

**6.Syllabus Focus**

a)Relevance to Local, Regional, National and Global Development Needs

| S. No | Student Centric Methods Adopted | Type/Description of Activity   |
|-------|---------------------------------|--|
| 1.    | National                        | The course teaches about nutritional needs and emphasizes on planning a balanced diet for different age groups.. |
| 2.    | Global                          | Promotes healthy dietary patterns and sustainable food choices..   |

b) Components on Skill Development/Entrepreneurship Development/Employability

| SD/ED/EMP                           | Syllabus Content     | Description of Activity   |
|-------------------------------------|----------------------|---|
| Skill Development (NSQF level 3 &4) | Module I,II,III & IV | Planning low cost diets in different stages of life                             |
| Entrepreneurship Development        | Module I,II,III & IV | Low-cost nutritious food preparation, Homemade weaning foods and healthy snacks |
| Employability                       | Module I,II,III & IV | Anganwadi nutrition helper<br>Health and wellness educator                      |

## c) IKS components

| IKS | Syllabus Content   | Module      |
|-----|--|-------------|
| IKS | Use of traditional balanced diets based on cereals, pulses, vegetables, milk, and fruits. Importance of millets and indigenous grains in daily diets. Traditional postpartum diets for mothers. Emphasis on seasonal eating and locally available foods. | I,II,III,IV |

Aligned with (SDG 3 (Good Health and well-being) and SDG 4 (Quality Education))

**7. Pedagogy**

| S. No | Student Centric Methods Adopted | Type / Description of Activity  |
|-------|---------------------------------|---|
| 1.    | Participative Learning          | Presentations and Group discussions   |
| 2.    | Experiential Learning           | Field Trips to Anganwadi Centres  |
| 3.    | Practical Learning              | Demonstration and preparation of balanced meals, weaning foods, and healthy snacks. |

**8. Course Assessment Plan****a) Weightage of Marks in Continuous Internal Assessments and End Semester Examination**

| CO  | Continuous Internal Assessments CIA - 40%              | End Semester Examination- 60% |
|-----|--|-------------------------------|
| CO1 | CIA 1 – Subjective                                     | Written Exam                  |
| CO2 | CIA 1 – Subjective                                     |                               |
| CO3 | CIA 2 – Test 1: Low Cost Weaning Foods/Breakfast Foods |                               |
| CO4 | CIA 2 – Test 2: MCQ's or Assingment                    |                               |

## b) Model Question Paper – End Semester Exam Theory

## NUTRITION FOR THE FAMILY

Course Code: U26/ NUT/ DSC/201  
Credits: 4

MAX MARKS: 60  
TIME: 2 hours

## SECTION – A (Long Essay Type)

Answer ALL questions:

Marks: 4 x 10 =40

1. What is meal planning and its objectives?  
OR
2. Write about the nutritional requirements for adults.
3. Discuss the food and nutrient requirements during pregnancy.  
OR
4. What makes breast milk an ideal food for infants?
5. Describe the various School Lunch Programmes.  
OR
6. Write in detail about the nutrient requirements and problems faced for a pre-school going child.
7. Explain the term Geriatric nutrition. What are the physiological changes occurring during aging?  
OR
8. Discuss the nutritional requirements during adolescence. Write a note on food choices and eating habits.

## SECTION – B

II . Answer any FOUR of the following

4 x 5 = 20 M

9. Food Pyramid
10. Balanced Diet
11. Physiology of Lactation
12. Weaning foods
13. Packed Lunch
14. Modification of diet during Oldage

**FUNDAMENTALS OF NUTRITION**  
**Practical Syllabus**

**1. Course Description**

**Programme:** B. Sc  
**Course Code:** U26/ NUT/ DSC/201/P  
**Type of Course:** DSC-2  
**No. of Credits:** 1

**Max. Hours: 30**  
**Hours per week: 2**  
**Max.Marks :50**

**2. Course Objectives**

1. Understand the basics of meal planning and to gain knowledge in meal preparation for the different stages of life.
2. Gain knowledge in calculation of various nutrients required for the particular age groups.

**3. Course Outcome:**

On completion of the course the student will be able to:

**CO1:** To apply the knowledge of planning diet charts of different age groups

**CO2:** To understand the different age groups and their nutritional requirement. .

**4. Practical Sessions**

Planning of diets for various age groups:

1. Adult man - sedentary
2. Adult woman – sedentary,
3. Pregnant woman- Moderate worker.
4. Lactating mother- Sedentary worker.
5. Preschool child
6. School going
7. Adolescent girl
8. Adolescent boy
9. Geriatrics

## 5. Model Question Paper – End Semester Exam Practical

## NUTRITION FOR THE FAMILY

Course Code : U26/NUT/DSC/201/P

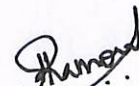

Type of Course : DSC-2

Max Marks : 50

No. of credits : 1

Answer the following

1. Plan a day's diet for the given age group (A, B, C) 20 M
- A. 20 M
- B. 20 M
- C. 20 M
- a) Introduction 5 M
- b) Write the RDA for the above mentioned age group 5 M
- c) Menu for the day 10 M
2. Calculate the nutritive value for the planned diet 25 M
- a) Calculations 15 M
- b) Grand total table 5 M
- c) Result 5 M
- 3) Record 5 M

## 1. COURSE DESCRIPTION

|                 |                   |                 |    |
|-----------------|-------------------|-----------------|----|
| Programme:      | B. Sc             | Max. Hours:     | 60 |
| Course Code:    | U26/ ZOO/ DSC/201 | Hours per week: | 4  |
| Type of Course: | DSC-II            | Max. Marks:     | 60 |
| No. of Credits: | 4                 |                 |    |

## 2. COURSE OBJECTIVES

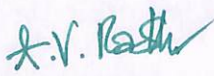

1. To impart a comparative understanding of vertebrate organ systems, highlighting structural and functional modifications across evolutionary lineages.
2. To provide foundational knowledge of developmental biology, emphasizing embryonic processes, organogenesis, and evolutionary developmental mechanisms.

## 3. COURSE OUTCOMES

After the successful completion of the course, the student will be able to:

- CO1: Compare and contrast** integumentary, skeletal, muscular, and other organ systems across vertebrates, recognizing evolutionary modifications and adaptive significance. (L IV)
- CO2: Explain** the evolutionary trends in digestive, respiratory, circulatory, excretory, reproductive, nervous, and sensory systems, linking structure to function. (L II)
- CO3: Explain** the evolutionary trends in reproductive, nervous, and sensory systems, linking structure to function. (L II)
- CO4: Describe and analyze** key developmental processes such as gametogenesis, fertilization, cleavage, gastrulation, organogenesis, and placentation in vertebrates. (L II)

  
**PROFESSOR & HEAD**  
 Department of Zoology, UCS  
 Osmania University, Hyd-07.

  
**CHAIRPERSON**  
 Board of Studies in Zoology  
 Osmania University, Hyderabad.

  
**HEAD DEPARTMENT OF ZOOLOGY**  
 ST. FRANCIS COLLEGE FOR WOMEN  
 BEGUMPET, HYDERABAD-T.S.

#### 4. COURSE CONTENT

##### **MODULE I: INTEGUMENTARY, SKELETAL, AND MUSCULAR SYSTEMS 15 HRS**

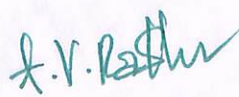

- 1.1 Comparative study of structure and function of integument and its derivatives (glands, scales, feathers, and hair) from fishes to mammals.
- 1.2 Comparative study of axial skeleton in fishes to mammals (skull and vertebrae).
- 1.3 Comparative study of appendicular skeleton in fishes to mammals (pectoral and pelvic girdles; limbs).
- 1.4 Comparative anatomy of axial, appendicular, branchiomic and integumentary muscles.
- 1.5 Comparative study of adaptive modifications in vertebrate locomotion (swimming, walking, and flying).

##### **MODULE II: DIGESTIVE, RESPIRATORY, CIRCULATORY AND EXCRETORY SYSTEMS**

**15 HRS**

- 2.1 Evolution of the Digestive System – Structural and functional modifications of the alimentary canal and digestive glands from fishes to mammals.
- 2.2 Respiratory System Adaptations – Comparative study of respiratory structures (gills, swim bladders, lungs, and air sacs) and their evolutionary significance.
- 2.3 Circulatory System Variations – Morphological and functional diversity of the heart, aortic arches, Lymphatic System in vertebrates.
- 2.4 Excretory System and Osmoregulation – Evolution of kidneys, urinary bladders, and their ducts in different vertebrate groups with adaptations to aquatic and terrestrial environments.
- 2.5 Nephron and Kidney Evolution – Comparative anatomy of nephron structure, types of kidneys (pronephros, mesonephros, metanephros), and their evolutionary succession.

  
PROFESSOR & HEAD  
Department of Zoology, UCS  
Osmania University, Hyd-07

  
CHAIRPERSON  
Board of Studies in Zoology  
Osmania University, Hyderabad.

  
HEAD DEPARTMENT OF ZOOLOGY  
ST. FRANCIS COLLEGE FOR WOMEN  
BEGUMPET, HYDERABAD-T.S.

**MODULE III: REPRODUCTIVE, NERVOUS, AND SENSORY SYSTEMS 15 HRS**

3.1 Evolution of Reproductive Organs – Structural and functional modifications in male and female reproductive organs from fishes to mammals.

3.2. Reproductive & Parental Care Strategies across vertebrates.

3.3 Comparative Anatomy of the Nervous System – Structural variations in the vertebrate brain and cranial nerves from fishes to mammals.

3.4 Spinal Cord and Peripheral Nervous System – Comparative study of the spinal cord and spinal nerves, their structural and functional modifications in vertebrates.

3.5 Sensory Organs and Receptor Systems – Comparative study of sensory organs (vision, hearing, taste, smell, and touch) and sensory receptors (special somatic and special visceral receptors) from fishes to mammals.

**MODULE IV: DEVELOPMENTAL BIOLOGY 15 HRS**

4.1 Early Embryonic Development: Gametogenesis (spermatogenesis and oogenesis) in mammals; vitellogenesis in birds; Fertilization mechanisms, and blocks to polyspermy.

4.2 Cleavage and Gastrulation: Structure of the fertilized chick egg; Patterns of cleavage, presumptive areas, fate maps.

4.3 Late Embryonic Development: Implantation of the rabbit embryo; Extraembryonic membranes; Placenta and types.

4.4 Organogenesis: Morphogenetic movements; Neurulation and notogenesis in frogs.

4.5 Assisted Reproductive Technologies (ART): Artificial insemination, In vitro fertilization (IVF), Embryo transfer and cryopreservation.

  
**PROFESSOR & HEAD**  
Department of Zoology, UCS  
Osmania University, Hyd-07

  
**CHAIRPERSON**  
Board of Studies in Zoology  
Osmania University, Hyderabad

  
**HEAD DEPARTMENT OF ZOOLOGY**  
ST. FRANCIS COLLEGE FOR WOMEN  
BEGUMPET, HYDERABAD-T.S.

## 6. SYLLABUS FOCUS

a) Relevance to Local, Regional, National and Global Development Needs

|  |  |
|--|--|
| Local /Regional/National /Global Development Needs | Relevance  |
| Global Development Needs                           | <p>It is important to develop an understanding of the anatomical structures that help explain functional adaptations and evolutionary relationships among vertebrates.</p> <p>Developmental biology studies include stages such as fertilization, cleavage, gastrulation, and organogenesis that help to understand how organisms grow from a single fertilized egg to a complex organism.</p> |

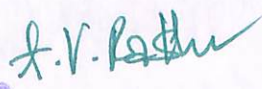

b) Components on Skill Development/Entrepreneurship Development/Employability

| SD/ED/EMP | Syllabus Content | Description of Activity   |
|-----------|------------------|---------------------------|
| SD        | I, II, III & IV  | Guest lecture and Seminar |

## 7. PEDAGOGY

| S. No | Student Centric Methods Adopted | Type / Description of Activity    |
|-------|---------------------------------|-----------------------------------|
| 1.    | Experiential Learning           | Field Trips, Science Experiments  |
| 2.    | Participative Learning          | Presentation, Seminar & Workshops |

  
 PROFESSOR & HEAD  
 Department of Zoology, UCS  
 Osmania University, Hyd-07

  
 CHAIRPERSON  
 Board of Studies in Zoology  
 Osmania University, Hyderabad.

  
 HEAD DEPARTMENT OF ZOOLOGY  
 ST. FRANCIS COLLEGE FOR WOMEN  
 BEGUMPET, HYDERABAD-T.S.

## 8. COURSE ASSESSMENT PLAN

### a) Weightage of Marks in Continuous Internal Assessments and End Semester Examination

| CO  | Continuous Internal Assessments CIA - 40% | End Semester Examination-60% |
|-----|---|------------------------------|
| CO1 | CIA-1 Written Test                        | Written Exam                 |
| CO2 | CIA-1 Written Test                        |                              |
| CO3 | CIA-2 Assignment                          |                              |
| CO4 | CIA-2 Objective Test                      |                              |

  
**PROFESSOR & HEAD**  
 Department of Zoology, UCC  
 Osmania University, Hyd-07.

**CHAIRPERSON**  
 Board of Studies in Zoology  
 Osmania University, Hyderabad.

  
**HEAD DEPARTMENT OF ZOOLOGY**  
**ST. FRANCIS COLLEGE FOR WOMEN**  
**BEGUMPET, HYDERABAD-T.S.**

**b) Model Question Paper – End Semester Exam Theory**

**COMPARATIVE ANATOMY OF VERTEBRATES AND DEVELOPMENTAL BIOLOGY**

**Course Code: U26/ ZOO/ DSC/201**  
**Credits: 4**

**MAX MARKS: 60**  
**TIME: 2 hours**

Note: This question paper consists of Section A and B.

The answer to Section A & B must be written in the answer book given.

**SECTION – A (Long Essay Type)**

**Answer ALL questions:**

**Marks: 4 x 10 = 40**

1. Compare the structure and function of integument and its derivatives of Aves and Mammals.  
OR
2. Explain adaptive modifications in vertebrate locomotion
3. Trace the evolution of heart in vertebrate series.  
OR
4. Explain the Evolution of kidneys, in different vertebrate groups with adaptations to aquatic and terrestrial environments.
5. Compare the Structural variations in the vertebrate brain  
OR
6. Explain functional modifications in female reproductive organs in Amphibians and Reptiles.
7. What is gametogenesis? Explain spermatogenesis and write how it differs from Oogenesis.  
OR
8. Write about the structure and functions of placenta and add a note on its significance.

**SECTION –B (Short Essay Type)**

II. Write short notes on any **FOUR** of the following:

**Marks: 4 x 5 = 20**

9. Integumentary muscles.
10. Pelvic girdles.
11. Air sacs.
12. Digestive glands in fishes
13. Sensory receptors
14. Patterns of cleavage

*f.v. Rastur*  
**HEAD DEPARTMENT OF ZOOLOGY**  
**ST. FRANCIS COLLEGE FOR WOMEN**  
**BEGUMPET, HYDERABAD-T.S.**

## Question Paper format – Blooms Taxonomy Level

| SECTION A - INTERNAL CHOICE   |                |  |      | 4Q X 10 M = 40 M            |
|---|----------------|--|------|-----------------------------|
| Question Number   | Module Covered | Question   | CO   | BTL (Blooms Taxonomy Level) |
| 1   | Module 1       | Compare the structure and function of integument and its derivatives of Aves and Mammals.                                  | CO 1 | Level II & IV               |
| 2   | Module 1       | Explain adaptive modifications in Vertebrate locomotion  | CO 1 | Level IV                    |
| 3   | Module 2       | Trace the evolution of heart in vertebrate series.   | CO 2 | Level II & IV               |
| 4   | Module 2       | Explain the Evolution of kidneys, in different vertebrate groups with adaptations to aquatic and terrestrial environments. | CO 2 | Level II                    |
| 5   | Module 3       | Compare the Structural variations in the vertebrate brain  | CO 3 | Level IV                    |
| 6   | Module 3       | Explain functional modifications in female reproductive organs in Amphibians and Reptiles.                                 | CO 3 | Level II                    |
| 7   | Module 4       | What is gametogenesis? Explain spermatogenesis and write how it differs from Oogenesis.                                    | CO 4 | Level IV                    |
| 8   | Module 4       | Write about the structure and functions of placenta and add a note on its significance.                                    | CO 4 | Level II & III              |
| SECTION B - ANSWER ANY 4 OUT OF 6<br>(To compulsorily have ONE question from each module) |                |  |      | 4Q X 5 M = 20 M             |
| 9   | Module 1       | Integumentary muscles.   | CO 1 | Level I                     |
| 10  | Module 1       | Pelvic girdles   | CO 1 | Level II                    |
| 11  | Module 2       | Air sacs   | CO 2 | Level II                    |
| 12  | Module 2       | Digestive glands in fishes   | CO 2 | Level I                     |
| 13  | Module 3       | Sensory receptors  | CO 3 | Level II                    |
| 14  | Module 4       | Patterns of cleavage   | CO 4 | Level I                     |

## COMPARATIVE ANATOMY OF VERTEBRATES AND DEVELOPMENTAL BIOLOGY PRACTICAL SYLLABUS

### 1. COURSE DESCRIPTION

|                        |                            |                        |           |
|------------------------|----------------------------|------------------------|-----------|
| <b>Programme:</b>      | <b>B. Sc</b>               | <b>Max. Hours:</b>     | <b>30</b> |
| <b>Course Code:</b>    | <b>U26/ ZOO/ DSC/201/P</b> | <b>Hours per week:</b> | <b>2</b>  |
| <b>Type of Course:</b> | <b>DSC-II</b>              | <b>Max. Marks:</b>     | <b>50</b> |
| <b>No. of Credits:</b> | <b>1</b>                   |                        |           |

### 2. COURSE OBJECTIVES

- To provide hands-on experience in comparative anatomy and developmental biology through observation, dissection, histological study, and embryological analysis, thereby reinforcing theoretical knowledge with practical skills.

### 3. COURSE OUTCOMES

- Identify and compare skeletal structures, tissues, and organ systems across representative vertebrates, recognizing evolutionary modifications and functional adaptations.
- Demonstrate practical understanding of vertebrate embryology by observing and analysing developmental stages such as cleavage, gastrulation, and neurulation using prepared slides.

### 4. COURSE CONTENT

- Comparative Study of Vertebrate Skeletons:**  
Observation and identification of skeletal structures from different vertebrate groups (Fishes, amphibians, reptiles, birds, mammals).
- Histological Examination of Tissues:** Microscopic study of integumentary, muscular, and glandular tissues in different vertebrates.
- Virtual Dissection and Organ System Comparison:** Dissection of representative vertebrates to study the digestive, respiratory, circulatory, nervous and urogenital systems.
- Comparison of the anatomy of locomotory appendages** in different groups of vertebrates.
- Developmental Biology Experiments:** Study of frog/chick embryology through prepared slides, observation of cleavage, gastrulation, and neurulation stages.

### 5. SUGGESTED MANUALS:

- Freeman; Bracegirdle, An atlas of embryology
- George C. Kent, Robert K. Carr. Comparative Anatomy of the Vertebrates, 9th ed. McGraw Hill.
- Kenneth Kardong Vertebrates: Comparative Anatomy, Function and Evolution, 4th ed, McGraw Hill.

  
**PROFESSOR & HEAD**  
 Department of Zoology,  
 Osmania University, Hyderabad.

  
**CHAIRPERSON**  
 Board of Studies in Zoology  
 Osmania University, Hyderabad.

**ST. FRANCIS' COLLEGE FOR WOMEN**  
**BEGUMPET, HYDERABAD-T.S.**

## 6. MODEL QUESTION PAPER – END SEMESTER EXAM PRACTICAL

### COMPARATIVE ANATOMY OF VERTEBRATES AND DEVELOPMENTAL BIOLOGY

Programme: B.Sc.

Course Code: U26/ZOO/DSC/201/P

Type of Course: DSC-II

Max. Marks: 50

No. of credits: 1

#### I. Comparative Study of Vertebrate Skeletons:

Observation and identification of skeletal structures from different vertebrate groups (fishes, amphibians, reptiles, birds, mammals). 4x3M=12 M

Skull, Vertebrae, Girdles and Limb bones

#### II. Microscopic Identification of Tissues:

Integumentary, Muscular, and Glandular tissues in different vertebrates. 2X3M=6M

III. Draw and label the dissected model of any 2 vertebrate groups (fishes, amphibians, reptiles, birds, mammals) 2 X5M= 10M

Digestive/ Respiratory/ Circulatory/ Nervous and Urinogenital systems.

IV. Comparison of the anatomy of locomotory appendages in different groups of vertebrates.

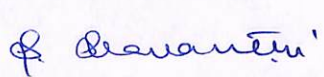

1x2M=2M

V. Identification of Developmental Biology slides:

4x2.5M=10M

VI. Record

10M
