

St. Francis

College for Women
Begumpet, Hyderabad-500016

(Autonomous & Affiliated to Osmania University)

Institutional Distinctiveness

Embedding Environment Consciousness among the Student Fraternity

With the goal of sustainability in mind St. Francis College has undertaken umpteen initiatives so as to inculcate environment consciousness among its student body. One of the initiatives is to establish Prakriti - the Nature club drawing its membership across faculties.

Life in Soil – A plantation drive: It is a month-long activity where the students from all the departments of the college plant saplings at college, home and in their neighbourhood. Bottle garden rejuvenation and preparation of Eco minions (Green pots) are part of this event.

Clean-up drive of water bodies is undertaken regularly in collaboration with GHMC.

Other than the above mentioned, various activities are undertaken such as guest lectures by prominent environmentalists, composting workshops, water bowl distribution for stray animals, hands on experience on waste segregation and management, poster presentations and field visits to renewable energy centres.

Aforementioned activities help build environmentally responsible student body who would consistently aspire and contribute towards attainment of a sustainable society.
